Profile

Computer Science undergraduate focused on full-stack development with experience in Java, Spring Boot, React.js, Node.js, REST APIs, databases, and microservices. Skilled at building practical, user-focused applications with clean backend architecture, responsive interfaces, and strong problem-solving fundamentals.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, C++

Frontend: HTML, CSS, React.js, Tailwind CSS, GSAP, Three.js

Backend/Technologies: Spring Boot, Spring Security, Spring Data JPA, Hibernate, Node.js, Express.js, JWT, REST APIs, MongoDB, MySQL, RabbitMQ, AWS S3

Tools/Concepts: Git, GitHub, Docker, Maven, JUnit, Agile Methodology, Cursor, OOP, DSA, MVC, API Development, Database Design, Microservices

Remote Work: Virtual Collaboration via Microsoft Teams and Zoom, Time Management, Document Management, Adaptability Across Time Zones, Remote Onboarding and Training

Projects

CloudVault — Secure Client Document Exchange Platform — *Java 21, Spring Boot, AWS S3, PostgreSQL, JUnit, JWT, Docker Compose, React.js*

- Built a secure document exchange platform supporting 4 file formats and uploads up to 10 MB.
- Developed 13+ REST APIs for authentication, file operations, search, sorting, sharing, and activity tracking.
- Integrated private AWS S3 storage with 10-minute presigned URLs without exposing AWS credentials.
- Implemented JWT, BCrypt, owner-based authorization, revocable share links with 3 expiration options, and audit logs for 6 security-critical actions.
- Configured PostgreSQL with Docker Compose and added 18 tests, Flyway, Swagger, and GitHub Actions.

UPI Wallet Simulator — *Java, Spring Boot, Spring Security, Spring Data JPA, JWT, MySQL, React.js*

- Built a full-stack wallet simulator with 7 REST APIs for KYC, wallet funding, transfers, refunds, lookup, and transaction history.
- Implemented KYC onboarding, wallet activation, bank funding, wallet-to-wallet transfers, and refunds.
- Used Spring Data JPA and Hibernate with 3 entities and 3 repositories for wallets, KYC records, and transaction ledger data.
- Designed a React.js dashboard with 4 modules for wallet overview, KYC operations, transfers, and ledger history.

Airline Management System — *React.js, Node.js, Express.js, MySQL, Sequelize, JWT, RabbitMQ*

- Delivered flight search, authentication, booking, trip history, administration, and notification workflows across 5 backend services.
- Developed 20+ REST APIs for flights, airports, aircraft, authentication, bookings, trip history, and admin operations.
- Connected 2 services through RabbitMQ for durable, event-driven booking notifications.
- Secured API traffic with JWT authorization, validation, proxy routing, logging, and a 100-request-per-2-minute rate limit.

API Rate Limiter — *Java, Spring Boot, Bucket4j, REST APIs*

- Configured Bucket4j token-bucket rate limits such as 100 requests/minute per client to control API traffic.
- Implemented request throttling with custom HTTP 429 Too Many Requests responses across multiple API endpoints.
- Created reusable filtering components that can be integrated into microservices for traffic management.

Education

Chandigarh University, Punjab, India — B.E. in Computer Science
CGPA: 7.17

Aug 2022 – Aug 2026

St. Joseph's School, Uttar Pradesh — Intermediate (ISC)
Percentage: 79.5%

Aug 2020 – Jun 2021

St. Joseph's School, Uttar Pradesh — Matriculation (ICSE)
Percentage: 82%

Aug 2018 – Jun 2019

Achievements & Certifications

- Earned the **HackerRank Gold Badge** in Java and the **HackerRank Silver Badge** in Problem Solving.
- Solved **300+ DSA problems** across LeetCode, HackerRank, and GeeksforGeeks.
- Earned an **NPTEL Silver Certification** in Foundations of Cloud Computing ([Certificate](#)).
- Earned an **NPTEL Silver Certification** in Foundation of Cloud IoT Edge ML ([Certificate](#)).
- **Certificate in Soft Skills Proficiency** ([Certificate](#)).
